

Date: 3/1/17

Wednesday Challenge Form

•Group Members: Jason, Christian, David and Alvin

•Problem Statement: Make a duck tail that has transitions that are as smooth as possible

•Approach: We were paired with Alvin who did all of the math but allowed us to do most of the cutting out of the three transitions

•Solution: We made the transitions very large to minimize the errors and we also won

•Lessons Learned: Make sure to know the math before you start a project plus we won
