

## Wednesday Challenge Form

•Group Members: Jason, Edgar and Christian

•Problem Statement: A group had to create a better version of the device that was created last week.

•Approach: We tried to make something similar to a bayblade which is a toy that when the spikey rope is pulled the device spins in quick fashion.

•Solution: We made the bayblade a part of the flying toy so That it would gain massive air

•Lessons Learned: We won so just form this group again
