

Date: 2/8/17

## Wednesday Challenge Form

- Group Members: Jason, Christian, Lucas and Edgar

- Problem Statement: Design a handout for the robotics team to give away at the Robot Con. You had to make it cool, 50 cents, creative, and sort of relate to the game.

- Approach: We decided to make a stress ball  
After one of our group members suggested it

- Solution: We designed a stress ball that was the shape of a zeplin

- Lessons Learned: We won again so we suggest that we form the same group again
